China Premium Data Set

The most comprehensive premise level address data for China

The Loqate China Premium Data Set is the most comprehensive premise-level address data on the market, enabling businesses engaged in cross-border commerce to deliver their goods and services to hundreds of millions of customers in China.

Key Features

- Integrated into Loqate's global type-ahead Address Capture and Address Verification solutions
- Enables verification to a premise level
- Significantly enhances depth and breadth street/thoroughfare level data

Business Benefits

- Reduce failed deliveries: Verifying addresses of customers in China saves businesses wasted international shipping costs in failed delivery attempts and chargebacks
- Enhance the customer experience: Address Capture will auto-populate any Chinese address fields in three keystrokes or less, reducing data entry time by more than 78% and errors by 20%
- Meet regional compliance requirements: Improve address-level data helps companies better verify shoppers, while also helping ensure Know Your Customer (KYC), anti-fraud regulations and address data quality requirements in region are met
